PROFILE

Frontend Developer with hands-on experience building responsive web applications using HTML, CSS, JavaScript, React, and Tailwind CSS. Have built real-world projects including a PWA for phishing URL detection and an AI-based fashion recommendation platform. Actively seeking frontend developer or internship opportunities to grow in a product-based environment.

PROJECTS

URL Scanner PWA | React, JavaScript, Tailwind CSS

- Built a mobile-first Progressive Web App to detect phishing and malicious URLs in real time
- Integrated SSL certificate checks and IP origin detection for user safety
- Deployed on Vercel with responsive UI and optimized performance

AI Outfit Recommendation Platform | React, Node.js

- Developed frontend interfaces for personalized outfit recommendations
- Designed user-friendly UI flows for browsing and suggestions
- Collaborated AI logic with backend APIs

XFused Official Website

- Developed and launched the company website.
- Built responsive UI with React and Tailwind CSS.
- Improved usability, performance, and accessibility.

EXPERIENCE

Web & AI Agent Intern — [XFused](#)
Remote, India | 6 Months

- Built and deployed the website for a skin-care brand.
- Developed responsive UI and product pages using React & Tailwind.
- Integrated APIs and supported AI-powered functionality.
- Maintained code and collaborated using Git/GitHub.
